MARKET ISSUES

THE MARKET PARADOX

Why do 95% of traders fail while the market always has winners

Actual Success Rate

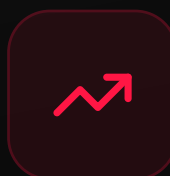

70-90% lose money within the first 3-6 months

Asymmetric Risk

Retail investors bear **100% of the capital risk** for limited profits, creating an uneven playing field from the start.

Psychology & Discipline

Lack of automated capital management tools leads to emotional trading. **Nearly 100%** of accounts are liquidated due to "revenge trading."

Technical Barriers

Information Gap
